

The 20th International Conference on Computational Science and its Applications

ICCSA 2020 goes online!

This year, the ICCSA conference will move to **online**.

Due to the uncertainties and restrictions related to the coronavirus pandemic, we have decided to hold this year's conference as a **virtual, online-only event**.

Some important matters relating to the virtual conference of ICCSA 2020 are as follows:

1. All accepted papers will be published by Springer in its LNCS series as a post-conference proceedings;
2. The new registration fees will be a single flat rate of **150€ per paper** ;
3. Paper submission deadline and important dates stay the same;
4. The dates of the ICCSA 2020 virtual conference will most likely remain the same (1-4 July 2020), although some activities may be rearranged and adapted to better suit time differences and the online presentation and discussion formats.

Our effort will now shift to designing and organising a productive and meaningful conference experience, adapting the established ICCSA activities and features (e.g. keynote addresses, parallel sessions, best paper awards, etc.) to the new online format.

The 20th International Conference on Computational Science and Applications (ICCSA 2020) will be held on July 1 - 4, 2020 in Cagliari, Italy in collaboration with the University of Cagliari, Italy.

ICCSA 2020 has been the next event in a series of highly successful International Conferences on Computational Science and Its Applications (ICCSA), previously held in Saint Petersburg, Russia (2019), Melbourne, Australia (2018), Trieste, Italy (2017), Beijing, China (2016), Banff, Canada (2015), Guimaraes, Portugal (2014), Ho Chi Minh City, Vietnam (2013), Salvador de Bahia, Brazil (2012), Santander, Spain (2011), Fukuoka, Japan (2010), Suwon, Korea (2009), Perugia, Italy (2008), Kuala Lumpur, Malaysia (2007), Glasgow, UK (2006), Singapore (2005), Assisi, Italy (2004), Montreal, Canada (2003), and (as ICCS) in Amsterdam, The Netherlands (2002) and San Francisco, USA (2001). The first ICCSA conference was co-organized by C.J.K. Tan (UK) and M. Gavrilova (U of Calgary, Canada) in 2003.

Computational Science is a main pillar of most of the present research, industrial and commercial activities and plays a unique role in exploiting Information and Communication Technologies as innovative technologies.

The ICCSA Conference offers a real opportunity to discuss new issues, tackle complex problems and find advanced enabling solutions able to shape new trends in Computational Science.

Submitted papers will be subject to stringent peer review by at least three experts and carefully evaluated based on originality, significance, technical soundness, and clarity of exposition.

All accepted papers will be included in the Springer Lecture Notes in Computer Science (LNCS) (<http://www.springer.com/computer/lncs?SGWID=0-164-0-0-0>) series and indexed by Scopus, EI Engineering Index, Thomson Reuters Conference Proceedings Citation Index (included in ISI Web of Science), and several

other indexing services. The papers will contain linked references, XML versions and citable DOI numbers.

Springer is able to manage ORCID ID related to the authors and the Proceedings Volumes Editors! Please add the ORCID ID related to each author of your submitted paper!!!

Warning: Fake ICCSA Conference by WASET

We have noticed the existence of organisations such as WASET that run fake “conferences” in order to make profit with the registration fees, often spoofing the names of real conferences. WASET claims to be organising a conference called ICCSA next year, which is a FAKE ICCSA conference.

The Real ICCSA conference has been organised by the ICCSA Society since 2003. We do not have any involvement with WASET. Please spread this news to your contacts and communities so that nobody mistakenly participates to such fake conferences.

WASET is predator publisher. Go to this Wiki
